Table of Contents

- 1.0 Problem description
- 2.0 Project objectives
- 3.0 Current systems
- 4.0 Intended users and their interaction with the system
- 5.0 Known interaction with other systems within or outside the client organization
- 6.0 Known constraints to development
- 7.0 Project schedule
- 8.0 Project team

1.0 Problem description / expression of need

I want a webpage and companion application that allows users to hire other users for odd jobs for periods of time. As an example I could hire another user to pick me up a coffee for 3 dollars.

2.0 Project Objectives

I want a website and companion application that allows a user to hire another user for a random job for a period of time.

3.0 Current System(s)

N/A

4.0 Intended users and their interaction with the system

The intended users are people with a bit of extra money to spend that don't have the time or skill to complete their small task.

5.0 Known interaction with other systems within or outside the client organization

- Banking systems
- A Users database to store all applicable information
- A Workers Database to store any applicable information

6.0 Known constraints to development

- Lack of sufficient funds
- Lack of development experience

7.0 Project Schedule

Broad overview, to be derived from course schedule

8.0 Project team

Project Proposal Summary (1 page)
Brayden Arthur - V00769726

I want a website and companion application that allows a user to hire another user for a random job for a period of time.

The Primary functions of the application include but are not limited to:

- Chatting between a user and a worker easily
- A rating system that allows a user to rate a worker with comments
- A user page and distinction between when a user wants to be a worker versus when they are searching for a worker
- A worker profile to highlight their skills
- A job description page for each individual job
- A safe payment system

• **My Résumé**

Brayden Arthur - V00769726

Project management experience

Managed people as an Usher
Groupwork in University/High School
Communication in workplace environments

I prefer a non-leadership position

Writing experience

English coursework

Webmaster experience

Coop web development position
Linkedmods.uvic.ca
Web tools
JQuery
User interface design skills
SVG visualizations
D3 visualizations

Software tool expert

Skill with many libraries of my programming languages
Proto.io
Wireframing experience

Programming skills

Java, Python, HTML, CSS, Javascript

Design experience

Wireframing experience
Protoshop experience
UML diagramming

Requirements engineering experience
